

Information on the methods of warning and conduct of the public in the event of an industrial accident at Increased Risk Plant Cargill Poland Sp. z o. o.

Facility:

**Cargill Poland sp. z o.o. headquarter in Warsaw
Włoska 22 Street, 02-675 Warsaw
Kiszkowo Department Rolna 2/4 Street,
62-280 Kiszkowo
entered into the Krajowego Rejestru Sądowego KRS
nr 0000281735 tel. 602 400 803; 061 424 91 00**

It is hereby confirmed that the plant in Kiszkowo due to the amount of hazardous materials that may be present on its premises, is subject to regulations on counteracting industrial accidents. The operator of the plant is the management board of Cargill Poland Sp. z o.o. The names of the management board can be found in the National Court Register at the website <https://ekrs.ms.gov.pl>.

The operator of the plant made a notification referred to in Art. 250 sec. 1 of the Environmental Protection Law, the competent authorities, i.e. the County Commander of the State Fire Service in Gniezno and the Provincial Inspector of Environmental Protection in Poznań. The plant operator also provided the above-mentioned authorities with the Breakdown Prevention Program.

The subject of activity of Cargill Poland Sp. z o.o. Kiszkowo Department is the production of animal feed additives. In a simplified manner, the manufacturing process can be described as mixing the raw materials in appropriate proportions. The raw materials for production are mostly bulk raw materials which are delivered to the plant by road transport, in bulk and in packages. Technological processes are carried out in two main facilities called pre-mix factories or production towers.

The classification of the plant to the group of plants with an increased risk of a serious industrial accident is determined by materials hazardous to the environment that may be present on the plant premises. These materials are listed below by giving their name and dividing them into categories. The threats posed by them are also listed.

Category E1, i.e. aquatic hazardous materials in Category Acute 1 or Chronic 1:

- Butylated hydroxytoluene,
- Zinc chelate,
- Dodecan-1-ol,
- Propyl gallate,
- Zinc Glycinate,
- Copper Glycinate,
- Limonene,
- Mircen,
- Pin-2 (3) -en,
- Pin-2 (10) -en,

- Zinc Sulphate,
- Copper (II) sulfate,
- Zinc oxide,
- Copper oxide,
- Hydrated zinc amino acid chelate,
- Hydrated copper amino acid chelate,
- Cobalt Carbonate,
- Nicotinamide menadione bisulfite.

Category E1, i.e. materials hazardous to the aquatic environment in Category Chronic 2:

- Butylated hydroxyanisole,
- Manganese glycinate,
- Manganese (II) sulfate.

All the above-mentioned substances are present at the plant in the form of loose additives for animal feed. All of them are approved for marketing and used in animal nutrition as well as they have appropriate approvals. There is no possibility of any accident occurring in which these substances could pose a threat to human health or life both inside and outside the plant.

Although there is no possibility of a failure that could threaten the safety of people, Cargill Poland Sp. z o.o. in order to maintain the highest standards and ensure the safety of both its employees and the inhabitants of Kiskowo, developed and implemented procedures of informing about industrial accidents in the plant. In the event of a serious industrial accident, the plant will immediately alert the relevant services, ie the County Commander of the State Fire Service in Gniezno and the Provincial Inspector of Environmental Protection in Poznań. These services, in consultation and cooperation with the authorities responsible for crisis management, will be able to decide to announce an alarm signal or a warning message in accordance with the provisions of the Regulation of the Council of Ministers of January 21, 2013 on contamination detection and notification systems, and jurisdiction of the authorities in these matters.

The alarm will be announced, and when the threat is resolved, it will be canceled as follows.

| TYPES OF ALARM SIGNALS | | |
|-------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------|
| TYPE OF ALARM | Acoustic alarm system (ALARM SIREN) | Voice alert |
| ALARM ANNOUNCEMENT | Modulated siren sound over a period of 3 minutes  | Attention! Attention! Attention! I ANNOUNCE AN ALARM (cause, type of alarm, etc.) |
| ALARM CANCELLATION | Continuous siren sound during the period 3 minutes  | Attention! Attention! Attention! I CANCEL THE ALARM (cause, type of alarm, etc.) |

In the event of an alarm announcement, proceed as follows:

- remain calm and disciplined and strictly follow the instructions of the rescue operation management,
- take children and disabled people to their homes,
- take livestock to their quarters,
- notify neighbors about the alarm - they may not hear it,
- close doors and windows tightly in residential and farm buildings and turn off air conditioning and ventilation devices
- extinguish and do not use open sources of fire (e.g. stoves, cigarettes, etc.),
- listen to radio and television broadcasts in local programs,
- in public spaces, follow the instructions of the administrator, owner or authorized person.

If you find yourself in the immediate contamination zone, you should leave the contaminated area by the shortest route, i.e. perpendicular to the wind direction, and then proceed as above.

It is expected that none of the events at the Cargill Poland Sp. z o.o. in Kizskowo will not cause the actual necessity to perform the above-mentioned activities, however, representatives of the public should be prepared and be able to react in the prescribed manner in the event of a threat alert. The threat alert will be announced in a similar way also in the case of other serious threats that will not be related to Cargill Poland Sp. z o.o.

Any additional information on safety and rules of conduct in the event of an industrial accident at Cargill Poland Sp. z o.o., with the exception of classified information, can be obtained at the premises of the plant.
